DIVYA PRASANTH PARAMAN
Bloomington, IN 47401
Email: dparaman@iu.edu **Phone:** +1-812-974-3423 LinkedIn

EDUCATION:

PhD. (Intelligent Systems Engineering), CGPA: 3.823/4 **Jan 2026 - Present**
Luddy School of Informatics, Computing, and Engineering, Indiana University Bloomington

M.S. (Data Science), CGPA: 3.9/4 **Aug 2023 - May 2025**
Luddy School of Informatics, Computing, and Engineering, Indiana University Bloomington

B.E. (Electronics and Communication Engineering), CGPA: 8.7/10 **Jun 2015 - May 2019**
Kumaraguru College of Technology (KCT), India

TEACHING EXPERIENCE:

Associate Instructor, Information Visualization **Spring 2026**
Faculty: Katy Börner, Class size: 75
Luddy School of Informatics, Computing, and Engineering, Indiana University Bloomington
- Delivered a guest lecture introducing AI-assisted visualization systems, mixed-initiative visual analytics, and human–AI collaboration in visualization design.
- Mentored and guided five student project teams, providing project management support and helping translate course concepts into applied visualization projects.
- Graded student work, helped develop rubrics, and contributed to framing course assignments.

Teaching Assistant, Information Visualization **Fall 2025**
Faculty: Andreas Bueckle, Class size: 75
Luddy School of Informatics, Computing, and Engineering, Indiana University Bloomington
- Mentored and guided six student project teams, providing project management support and helping translate course concepts into applied visualization projects.
- Graded student work, helped develop rubrics, and contributed to framing course assignments.

Teaching Assistant, Information Visualization **Spring 2025**
Faculty: Katy Börner, Class size: 130
Luddy School of Informatics, Computing, and Engineering, Indiana University Bloomington
- Developed a Python-based notebook leveraging LLMs to enable 130 students (including non-programmers) to generate, refine, and critique data visualizations.
- Mentored and guided eight student project teams, providing project management support and helping translate course concepts into applied visualization projects.
- Graded student work, helped develop rubrics, and contributed to framing course assignments.

Teaching Assistant, Advanced Database Concepts **Fall 2024**
Faculty: Chenghong Wang, Class size: 74
Luddy School of Informatics, Computing, and Engineering, Indiana University Bloomington
- Created and graded course assessments, including assignments, quizzes, and exams, to support students' understanding of course material and progress.
- Held weekly office hours to provide one-on-one support, clarify complex database concepts, and assist students with assignments.

HONORS AND AWARDS:

- Faculty Assistance in Data Science Scholarship, IUB, IN **May 2024**
- Received Mahatma Gandhi Scholarship Award for Academic Excellence, KCT, India **Jan 2018**

- Received Mahatma Gandhi Scholarship Award for Academic Excellence, KCT, India **Jan 2017**
- Received Mahatma Gandhi Scholarship Award for Academic Excellence, KCT, India **Jan 2016**

ACADEMIC PROJECTS:

Title: A Survey of Graph Neural Network Based Movie Recommender Systems **Spring 2024**

Team Size: Three **Role**: Tech Lead

- Conducted a comprehensive review of graph-based recommender system algorithms (e.g., LightGCN, GCMC), focusing on how they mitigate data sparsity issues in traditional collaborative filtering.
- Analyzed limitations in information propagation and update mechanisms, noting a bias toward aggregated information over user/item-specific representations.

PROFESSIONAL EXPERIENCE:

Analytics Engineer at Bounteous, India **Sep 2021 - Jul 2023**

- Developed machine learning models to derive insights and predict customer behaviour based on various factors such as intent, profile similarity, and engagement across CRM systems.
- Worked with business leaders to formulate hypotheses and develop and developed a business impact framework that provides various metrics/ methodologies to assess the impact of using predictive models in pipeline and revenue production.
- Gathered, analyzed, cleaned and interpreted the CRM data to produce high-quality business impact reports and dashboards.

Software Engineer at Soliton Technologies, India **Jun 2019 - Jan 2021**

- Developed various device GUI applications. These desktop applications enable users to quickly set up and understand semiconductor devices.

INTERNSHIPS:

Data Insights Intern at AAMC, Bloomington, IN **Sep 2024 - Dec 2024**

- Developed LLM-powered solutions to analyze Higher Logic engagement data and create advanced visualizations to support AAMC's content curation strategy.

Software Engineer Intern at Soliton Technologies, India **Aug 2018 - May 2019**

- Developed an angular-based web repository as part of Soliton's R&D team that facilitates software engineers across teams to share and reuse software modules to minimise duplication of efforts.
- Got trained in OOPS, Data Structures, Agile Methodologies and Software Development Life Cycle Practices.

PROFESSIONAL CERTIFICATIONS:

dbt Fundamentals, Databricks Certified Associate Developer for Apache Spark 3.0, Snowflake SnowPro Core Certification, Astronomer Certification for Apache Airflow Fundamentals, Power BI Data Analyst Associate by Microsoft, Neo4j Certified Professional, TensorFlow Developer Certificate by Google, Transactional Analysis Proficiency by Institute of Development Transactional Analysis.

COMMUNITY INVOLVEMENT:

Worked as Education Support Volunteer in Make a Difference organization **Jun 2017 - Nov 2017**

- Tutored high school students from economically disadvantaged backgrounds in Maths twice a week at Sevasharam Home, Coimbatore.
